

DESERT BOOT

Our multi-purpose Desert Boots are designed in such an innovative way that you can even wear them when you need to stand for long periods. The integrated arch support will always prevent your foot from becoming misaligned or flat footed.

SPECIFICATIONS

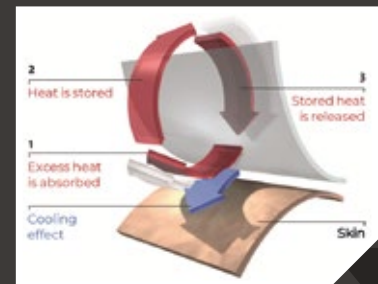

- Outlast mid layers all around the boot reducing temperature
- Water repellent beige leather with extremely high breathability
- TPU ankle pad
- NYLON air ventilation
- YKK zipper with ring puller
- Antibacterial treated 100% polyester lining

Duties that require you to walk and run a lot, especially on very hard surfaces in urban environments or mountains, put the utmost pressure on the bones of your feet. To combat this, the Desert Boots are equipped with extreme shock absorbing, integrated balance technology in the outsole to protect your bones. So you can stay alert whatever the task and focus on your job.

- Lining moisture absorbing and fast moisture spreading
- Full lasted upper for a good torsion resistance
- PU shock absorbing midsole, light weight
- Rubber outsole, strong, heat resistant and abrasion resistant
- Sizes 35 to 50

HYDRO CONTROL & GRIP

HOODS Desert Boots are designed to keep your feet extremely dry, comfortable and safe from the inside out – in the most extreme weather conditions. The soles also enable you to put less effort into achieving the same movement. Moreover, maximum grip is guaranteed in different situations and in all weather conditions.
