

## INNOVATION

At HOODS Professional Footwear we know that the possibilities to develop better footwear are constantly popping up all over the world. Super fabrics are developed and produced; we think that it is our duty to use all those new possibilities to develop even better footwear.

We are committed to proud workers. We know that we can achieve pride by listening to the wishes of those workers. Combining these two important views boosts our urge to develop new boots and shoes.

## LET'S TALK!

We co-operate closely with European knowledge partners. But more importantly, we co-operate closely with you: the users of our products. So let's talk, and find the best possible match between products and wishes. We are very interested in your opinion.
